## PROJECT

**Food-Delivery-Application** | source code: [GitHub](#)

- Developed a full-stack Food Delivery Application using MERN stack.
  - Implemented a responsive **client-side** with React and Context API, enabling seamless browsing of food items, order placement, and user account management.
  - Designed and integrated an **admin dashboard** using React and Context API for food management, order processing, and sales analytics.
  - Engineered a secure **server-side** application with Node.js, Express.js, MongoDB, JWT authentication, and *bcrypt* password hashing, *multer* for handling file uploads.
  - Utilized RESTful APIs for efficient communication between client, server, and database.
  - Integrated third-party APIs like *Stripe* for payments and *Nodemailer* for transactional emails, ensuring secure and efficient order transactions.
